

Oils for Pets

A quick usage guide

Canines

- small dogs: start with diffusing 1-4 drops in an open room
- larger dogs: start with direct oil application (optional: hot & cold compresses)
- internal application: add oils to drinking water and/or food, directly in the mouth, or into a vegetable capsule

Felines

- most receptive to diffusing
- oils high in phenols should be avoided or used with caution
- can administer oils by petting them or adding to kitty litter
- oils are not generally added to their food or water

Equines

- some may require less or more dilution
- stay with them for 15-20 minutes to check comfort level
- offer oils to both nostrils, as each side of the brain processes information differently
- use oils on stable walls, in DIY sprays, added to secondary water troughs, etc.

Avians

- introduce oils by misting, spraying, or diffusing them
- birds respond quite readily to essential oils in their drinking water
- rule of thumb: 1 drop of oil per quart of drinking water

Animal Scents Ointment

a rich, intensely hydrating salve that seals moisture into skin, replenishes skin's moisture barrier, and absorbs smoothly; made with naturally derived ingredients

Animal Scents Shampoo

a plant-based, deodorizing shampoo that gently cleans, moisturizes, conditions, and softens without stripping natural skin and coat oils; it also soothes dry, irritated, itchy, or rough skin and balances skin pH.

PuriClean

helps cleanse minor scrapes and scratches; comforts irritations; features the skin-improvement properties of Patchouli and Mountain Savory.

ParaGize

contains a relaxing, quieting blend that can be applied to your pet's abdomen; helps release feelings of discomfort with its comforting aroma

T-Away

helps alleviate pets' nervousness and supports feelings of comfort; can be applied topically or diffused to promote a balanced environment for your pets during times of tension.

Infect Away

helps clean wounds and soothes irritation; supports your pets with the beneficial properties of Myrrh and Dorado Azul essential oils.

Mendwell

soothes and moisturizes sensitive, distressed skin; aids in healing minor scrapes and scratches and has a pleasingly natural, earthy aroma.

Oils *for* Pets

DIY Stinky Pet Room Spray

- 20 drops Citrus Fresh
- Splash of witch hazel
- Distilled water

Add essential oil(s) and witch hazel to a 4 oz. glass spray bottle. Top with distilled water. Use as needed.

DIY Pup Toothpaste

- 1/4 cup organic coconut oil
- 1/4 cup baking soda
- 5-6 drops Peppermint Vitality

Mix ingredients and store in a 4 oz mason jar. Use a toothbrush to apply to dog's teeth. No need to rinse!

DIY Pet Collar Recipe

- 1 cup of water
- 5 drops Lavender
- 2 drops Citronella
- 1 drop Cedarwood
- 2 drops Geranium
- 2 drops Kunzea
- Dash of salt or witch hazel

Add ingredients to a bowl and stir. Add a cloth or leather collar to mixture; soak for 5 minutes. Remove collar from liquid and let dry before using. Pour remaining liquid into an empty spray bottle and use on pet before he/she goes outside.

DIY Paw Balm

- 2 TBSP shea butter
- 2 TBSP coconut oil
- 2 TBSP beeswax
- 1 tsp V-6 Vegetable Oil Complex
- 1 drop Animal Scents Mendwell
- 1 drop Animal Scents Infect Away
- 1 drop Animal Scents PuriClean

Combine ingredients in a small pot and place over medium heat until melted and mixed well. Pour into a small glass storage container and let cool for 2-3 hours or until fully solidified. Massage small amounts into your pet's paws as needed.

DIY Puppy Snacks

- 1 cup all-natural peanut butter
- 1 tsp organic coconut oil
- 1 drop Cinnamon Bark Vitality

Place the coconut oil in a small saucepan over medium-low heat and cook until melted. Add peanut butter and stir until mixture is completely smooth. Mixture should be thick but pourable. Remove from heat and add essential oil; stir well. Pour mixture into silicone molds and freeze until set. Carefully remove from tray and store in air-tight container in freezer. Note: You can adjust the coconut oil based on your dog's weight. General Rule of Thumb: 1 tsp coconut oil per 10 pound of you dog's body weight.
