

# Natural Hairspray

THE  
EASIEST  
DIY!

## Supplies

- Spray Bottle
- Water
- [Organic Aloe Vera Gel](#)

**NOTE:** Find an aloe vera that is more liquid than solid, there are lots of great options online if you don't find one locally. No artificial colors or other ingredients either!

## Instructions

- Fill your bottle about 1/2 way with water and add in a big squeeze of the aloe.
- Put the sprayer lid on and shake vigorously to mix, then test on a piece of hair.
- Continue adding aloe and water into the bottle and mixing/testing until the desired hold strength is reached!

*It's just that easy friends!*

**PRO TIP:** Use [Mermaid Hair Spray](#) after washing your hair to support your roots and scalp before styling.
