

DIY FABRIC SOFTENER

PART 1

20-25 drops Young Living essential oil of choice

2 cups vinegar

1/4 cup baking soda

Put the vinegar and EO in a large glass or stainless steel bowl,
gradually add the baking soda.

It will expand a lot so allow for that when choosing your bowl.

PART 2

1 cup boiling water

1 oz Young Living conditioner of choice

Mix together. Once the conditioner is fully blended with the water,
add it to part 1. Blend it all together. Once it's completely blended,
pour it into a glass jar for storage. I have used a recycled Ningxia

Red bottle for this.

Use about 1/4 cup per load of laundry
