# Recap (Website + Pages)

- Talk-to-edit web page builder
- Connect multiple domains with the new domain manager
- New web hosting for faster page speed
- Drag-and-drop in the page builder
- Page revision history to prevent loss of work
- New website themes
- New web templates and easy website setup
- Install custom fonts by uploading a font file
- Image framing
- Blog post URLs are now customizable
- Make a page like this one (turn an existing page into a new page for a different purpose)

# Recap (Email, Writing, Daily Workflow)

- New drag-and-drop email builder
- Talk-to-transcribe buttons throughout AttractWell
- Use the AI writer to rewrite or edit content by speaking or typing
- AI course creator improvements you can type or speak into

# Recap (Courses, Scheduling, Operations)

- Automatic lesson creation based on existing class content (except video)
- Booking links support letting the person booking choose who they want to book with
- Outbound calls can be automatically recorded by checking a box
- Dark mode inside AttractWell
- The app allows links to be copied and pasted
- Setup progress on the dashboard

# Recap (Selling, Forms & Safeguards)

- People can buy from the store without setting up an account
- Forms can include file upload fields
- Improved Canva integration with recommended pixel sizes and access to your Canva library
- Emails and phone numbers can now be blocked

...and that was *last year*

Talk to your system: everywhere you can speak to create, edit, or capture

- Talk-to-edit your web pages
- Talk-to-edit inside the block style email builder
- Talk-to-transcribe buttons throughout AttractWell (notes, emails, and more)
- Press and hold to speak a note on a contact record
- Speak to write an email
- Use the AI writer to rewrite or edit content by speaking what you want changed
- AI course creator: speak or type what you want
- Voice button on text chat (two-way texting)

# Upload a file or image to create pages, sections, campaigns, and classes

- Create a page from a URL (import + editable preview, enhance section by section)
- Quick website setup now includes a third option to import a page from a URL
- Create a page from a screenshot or PDF (optional image extraction on larger files)
- Create a page section from a screenshot or PDF (creates fully editable sections)
- Create a class by uploading a file or image (PDF, DOCX, PAGES, and more)
- Create a campaign by uploading a file or image (PDF, DOCX, PAGES, and more)

# AI: writing control inside AttractWell

- AI writer now uses three different APIs for writing requests (ChatGPT, Grok, and Claude)
- Choose which AI model you use in AI settings (note: some areas override this)

# Creating + Editing Website Pages

- Add page from URL with instructions and an import preview you can enhance section by section
- Finish the import preview and all images are added to your image library
- Add page from screenshot or PDF
- Add section from screenshot or PDF
- Make a page like this one (reuse an existing page for a different purpose)

# Creating + Editing Campaigns

- New campaign creator that drafts a campaign from a short description (or start from scratch)
- Add a new message to an existing campaign and auto-write it based on the other messages (or start from scratch)
- Create a campaign from your own outline by writing all messages on a single screen
- Edit all messages on an existing campaign on a single screen

# Increase engagement in your business

- Countdown timer in the email builder
  - Fixed end date & time, or relative to when email is sent
  - Customize font, text color, background, width, alignment
- Add polls in discussion room posts
  - Polls can auto-close on a certain date and time, or stay open

# Payments at booking

- Payments directly on calendar bookings
- Coupon support including \$0 coupons
- Offer one-time payments, recurring payments, or payment plans
- Payment plan options include Affirm, Klarna, Afterpay, and Clearpay
- Google Pay support
- If it's a call booking package with a recurring payment, each payment refreshes the package
