How to make melt & pour soap:

- For a 1 pound block of base:
- Cut your soap base into cubes
- Melt your soap base in the double boiler or pot over medium low. Melt the soap base slowly on low heat so it doesn't come to a boil or burn.
- Optional: Spray your mold with rubbing alcohol. This helps keep bubbles from forming in your soap bars.
- Add your add ins:
 - You can mix all your add ins to your entire batch of melted base:
 - up to about 5 tbsp of dry ingredients (like dried herbs & flowers, ground coffee, bentonite clay, etc).
 - sprinkle in mica until you reach your desired color (usually about 1/2 - 1 teaspoon).
 - essential oils to your desired scent level, usually 20-40 drops.
 - or you can customize each bar of soap:
 - I find it mixes best if I fill the mold half full with soap base, add the oils & extras, then top with more soap base.
 - You can add as much of each add in as you want! Have fun with it!
 - I use about 5-10 drops of essential oils per bar of soap.
 - Stir with a toothpick.
- Optional: Spray with rubbing alcohol again to remove bubbles.
- Let cool to room temperature. You can put in the fridge or freezer to speed up the process if needed.
- Remove from mold.
